

Dear Sir/Mam,

I am a Masters student in the international program “Master of Science in Informatiks” at the Technische Universität München (TUM)”. I am writing to express my interest for the Interdisciplinary project (IDP) on ReactJS Application for Internal.

I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are most important to me.

I started my career as a Software Engineer with CODERZ, India for a period of 2 years (September 2013 – September 2015). Working under the direction of senior members, I worked on many web applications and services including Content Management system, e-commerce sites and business solutions. This helped me in increasing my expertise and skills level in technologies like PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, MongoDB, BootStrap and CodeIgniter.

I have worked on Grid computing as my Bachelor thesis project, ‘Performance Evaluation on a Grid Computing Platform. It was based upon the creation of a grid environment and the evaluation of its working with the implementation of security measures in the same, which required extensive knowledge in Linux and C++. I was able to extend the research and findings of the project into a research paper on ‘Performance Evaluation of Grid Platform’ (IJTTCS).

I have also developed a mini project for remotely controlling and monitoring the activities of other PC’s using JAVA. Also, I have worked on optimization of webpage interface using genetic algorithm.

I am currently studying Web Application Engineering course (TUM) and due to my inclination towards Software Engineering and Web Applications/Services, I am planning to do my Majors in it.

Please find my CV enclosed. I look forward to learn new things and contribute in my best potential.

If you think I might fit for this IDP, you can call me on + 49 (0) 151 45970713 or email at dedmari_muneer@tum.de. Thanks for your consideration and time.

With Best Regards,

Muneer Ahmad
